†Also available in Saltwater Grade

\*\*\*\*\* Best Choice for the application.

\* May be used for the application, but other products would be better suited.

Tremco provides a broad selection of products for below-grade waterproofing applications. In many cases, there are several products which may be used depending on the demands of the application. The number of \* associated with the product indicates order of preference with \*\*\*\*\* being the Best Choice and \* indicating that it may be used, but better choices are available. No stars means that the product is not recommended for that application.

**Due to varying on-site conditions, this chart should be used only as a guideline. Please contact your local Tremco Sales Representative for a field assessment and recommendation.**
