

TREMPRO® JS-773+

General Purpose Butyl Sealant

Product Overview

TREMPRO® JS-773+ combines the convenience of in-plant application with the versatility of an offsite connection, making it a perfect choice for a variety of applications. While it can be used in any scenario where butyl tape is typically applied, this solution offers the advantage of avoiding preformed shapes, which is especially beneficial for lap sealing applications and metal-to-metal bonding. The gunnable application capability ensures ease of use and precise placement and its effectiveness as a vapor barrier adds to its wide-ranging utility. One of its unique features is its ability to be filled into a channel, allowing for easy insertion of objects later on.

Features & Benefits

- Ideal for buttering or bedding non-porous components
- Can be used to separate dissimilar metals
- Non-skinning, non-drying
- Long open time
- Ideal for panel to panel joints, HVAC ducts, and insulated metal panels

Packaging

10.1 oz (300-mL) cartridges
Also available in drums
