## Appropriate Engineering Controls

Mechanical ventilation or local exhaust ventilation may be required. Observe good industrial hygiene practices. Observe occupational exposure limits and minimize the risk of inhalation of dust.

Individual protection measures, such as personal protective equipment

| General information: | Provide easy access to water supply and eye wash facilities. Good general <br> ventilation (typically 10 air changes per hour) should be used. Ventilation <br> rates should be matched to conditions. If applicable, use process <br> enclosures, local exhaust ventilation, or other engineering controls to <br> maintain airborne levels below recommended exposure limits. If exposure <br> limits have not been established, maintain airborne levels to an acceptable <br> level. |
| :--- | :--- |
| Eye/face protection: | Wear safety glasses with side shields (or goggles). |
| Skin Protection |  |
| Hand Protection: | Use suitable protective gloves if risk of skin contact. |
| Other: | Wear chemical-resistant gloves, footwear, and protective clothing <br> appropriate for the risk of exposure. Contact health and safety professional <br> or manufacturer for specific information. |
| Respiratory Protection: | In case of inadequate ventilation use suitable respirator. Seek advice from <br> local supervisor. |
| Hygiene measures: | Observe good industrial hygiene practices. Wash hands before breaks and <br> immediately after handling the product. Avoid contact with eyes. Do not |
| handle until all safety precautions have been read and understood. Obtain |  |
