

Tremco Commercial Sealants & Waterproofing would like to congratulate its “**Zero-Waste Team**” for exemplifying the spirit of the following Tremco Cornerstone principles:

- We strive to be the employer of choice*
- We choose to enrich the communities in which we operate*
- We must generate consistently superior results*

The “Zero-Waste Team” is a group of Tremco employees from various departments throughout the organization who have joined forces to ensure that all of Tremco CS&W’s manufacturing facilities (with the exception of the Mississauga plant) and corporate offices will send nothing to landfill. After only one year, the team has shown tremendous progress and has already eliminated several waste streams at all of the facilities.

Team members include: Michael Schmeida, team leader; Ken McCallum; Robert Gourley; Nick Sellers; Bill Kehoe; John Wegman; Al DeJong; and Chuck Evans.
