Dymonic® FC Polyurethane Hybrid Sealant Combines the Benefits of Silicone and Polyurethane into One Sealant

BEACHWOOD, Ohio, (July 15, 2009) – Dymonic® FC Polyurethane Hybrid Sealant from Tremco provides sealant contractors with the best of all worlds including flexibility, affordability and high-performance in just one sealant. Formulated with Tremco's proprietary silane end-capped polymer (hybrid) technology, Dymonic FC provides the cost-effectiveness of a polyurethane but the durability of a silicone with superior adhesion to even the most difficult substrates.

Dymonic FC is a fast curing, low modulus, one-component, moisture-curing, polyurethane hybrid sealant. Due to Dymonic FC's hybrid technology, its enhanced durability and weatherability guarantees exceptional performance for a longer lifespan compared to traditional polyurethane sealants. Dymonic FC will tenaciously adhere to virtually any substrate including precast concrete panel joints, perimeter caulking (windows, doors and panels), EIFS, aluminum, masonry and vinyl siding. Dymonic FC's durable bond is also less susceptible to the negative effects of moisture and temperature.

Fast curing, it will skin in 60 minutes and become tack-free after only three to four hours, dramatically reducing the opportunity for dirt pick-up and staining. In addition, Dymonic FC will withstand heavy exposure to ultraviolet rays without fading or yellowing for true color stability over a long period of time. Dymonic FC is also environmentally friendly with nearly zero VOCs (< 6 grams/liter).

Unlike traditional silicones, Dymonic FC is paintable once it has fully cured. It's ideal for use in restoration applications where contractors require both better UV resistance and a paintable sealant. In addition, its fast-curing properties provide contractors with the ability to keep up with their fast-track deadlines.

To learn more about Dymonic FC Polyurethane Hybrid Sealant, go to www.tremcosealants.com or contact your local Tremco Sales Representative. Tremco Commercial Sealants & Waterproofing provides the sealant industry with a good, better, best product line including polyurethane, hybrid and silicone sealants.

Tremco Commercial Sealants & Waterproofing is a world-leading supplier of sealants and waterproofing for the commercial construction industry. Product lines include high-performance silicone and urethane joint sealants; waterproofing membranes; drainage protection; air barrier systems; deck coatings; expansion joints; the industry's only comprehensive glazing systems including silicone sealants, tapes, gaskets, and setting blocks; and a full line of passive fire protection products and systems. With experienced sales representatives in every major market throughout North America, Tremco is positioned to provide assistance for specification development, application-specific product development, problem-solving and assistance on site. For more information about Tremco Commercial Sealants & Waterproofing and its product lines, go to www.tremcosealants.com.
