NEWS RELEASE

TREMstop[®] Acrylic SP Provides Three Functions in One Sealant: Firestop, and Smoke and Sound Barrier

BEACHWOOD, Ohio, (June 4, 2008) – TREMstop[®] Acrylic SP Sprayable Acrylic Latex Firestop Sealant, part of a full line of passive fire protection products from Tremco Commercial Sealants & Waterproofing, exceeds standard requirements for providing sound isolation, in addition to providing high-performance protection against the spread of fire and smoke around construction joints and through-wall penetrations.

When tested using a standardized procedure defined in the ASTM E-90 for laboratories, TREMstop Acrylic SP earned a Sound Transmission Class (STC) rating of 59 with a U411 wall. The Uniform Building Code (UBC) requires that partitions separating dwelling units (including hotels, motels, apartments, condominiums, monasteries and convents) meet an STC 50 requirement for sound isolation if tested in a laboratory.

This all-purpose, spray-applied sealant provides significant savings in labor, especially on long joint runs for head-of-wall applications due to its ease of use and efficiency. A water-based formulation, it contains minimal VOCs making it neighbor-friendly. TREMstop Acrylic SP features excellent movement (+/- 25%) and superb unprimed adhesion to a wide range of substrates. In addition, when it's fully cured, it can be painted. TREMstop Acrylic also comes in a gun grade (GG).

Tremco is a leader in the passive fire protection products, services and solutions needed by firestop, plumbing, mechanical, electrical, insulation and drywall contractors throughout North America. The TREMstop line of fire protection products features sealants, intumescent devices, cast-in-place and forming material with more than 400 independently tested fire-rated systems for through penetrations and joints.

Tremco Commercial Sealants & Waterproofing is a world-leading supplier of sealants and weatherproofing for the commercial construction industry. Product lines include high-performance silicone and

urethane joint sealants; waterproofing membranes; drainage protection; air barrier systems; deck coatings; expansion joints; a full line of glazing products including sealants, tapes, gaskets, and setting blocks; and a complete line of firestopping. With experienced sales representatives in every major market throughout North America, Tremco is positioned to provide assistance for specification development, application-specific product development, problem-solving and assistance on site.
