

TREMSIL® 400

High-Performance Single-Component,
Neutral-Cure Silicone Sealant

Product Overview

Tremsil® 400 is a high-performance silicone sealant that is specifically designed to achieve a watertight seal in expansion joints and for general perimeter caulking. Tremsil 400 is a single-component, neutral-cure, medium-modulus sealant.

Available in over a dozen standard colors, it creates a watertight seal in expansion joints and for general perimeter caulking of windows, doors and frames, precast, and tilt-up panels.

The medium modulus of Tremsil 400 grants it the capability to handle up to 40% expansion and contraction, making it ideal for use in dynamically moving joints. Tremsil 400 offers primerless adhesion to most construction materials to reduce installation times.

Features & Benefits

- **Multi-Use:** Ideal for a variety of window, door and expansion joint applications
- **Fast & Easy Application:** Adheres without the need for primer on most construction materials and installs without any mixing requirement with conventional caulking equipment
- **Excellent Movement:** Medium-modulus chemistry provides movement capability of +/- 40% for high-performance in dynamically-moving joints
- **Low VOC:** Able to be used in VOC-regulated areas across the United States and Canada
