

Tremco Incorporated certifies that the Paraseal GM/LG 60-Mil heat welded sheet membrane system meets the physical properties per the Tremco Incorporated published data sheets, specifications, and application instructions.

The following pertain to the Paraseal GM/LG 60-Mil heat welded sheet membrane:

- 60-Mils of a polyethylene sheet membrane.
- One layer of spun bond polyester protection mesh laminated over the sodium bentonite clay.
- Life Expectancy of HDPE depends upon the specific application; however it is measured in potential hundred year increments as independently published by others.
