

Tremco Incorporated certifies that the Paraseal LG sheet membrane system meets the physical properties per the Tremco Incorporated published data sheets, specifications, and application instructions.

The following pertain to the Paraseal 20-Mil HDPE LG Membrane:

- 20-Mils of a high-density polyethylene sheet membrane, (HDPE).
- One layer of spun polypropylene protection mesh laminated over the sodium bentonite clay.
- Life Expectancy of HDPE depends upon the specific application, however it is measured in potential hundred year increments as independently published by others.
