

### TREMCO PERIMETER TRACE TOOL

The Tremco Perimeter Trace Tool is used to cleanly apply spacer to the IG unit's glass perimeter, while precisely controlling start point, inset, and notch locations. The tool allows for **inside notching** that preserves integrity of the spacer's moisture vapor barrier allowing a wider range of applied perimeter sealant options.

Trace Tool	Ref. Part #
Inside Notch/Punched Front-Cut	ENAIN502

### ENAPAD2 502 HOT MELT TROWELING PADS

These solid silicone rubber pads protect the operator during hot-closing of sealant corners for the elimination of cold joints. Pads are sized at 1.5" wide x 3.5" long x 0.175" thick (38 mm x 89 mm x 4 mm) and are sold in boxes of 50 (Ref. Part #ENAPAD2 502).

### ENERGRIP MUNTIN CLIPS

Available in a wide variety of configurations that vary with airspace and muntin bar styles, these polypropylene clips precisely secure the muntin bar to the spacer and do not impede on the sealing area of the applied secondary sealant. Parts are available in both gray and black and are sold in boxes of 5,000 pieces per configurations, depending on type. For more information, reference the Technical Guide on Muntin Clip Part Selection by Airspace & Muntin Style, through your Tremco Residential Glazing Representative.

### WARRANTY

A repair or replacement warranty is available on all Tremco products. Visit <https://www.tremcosealants.com/warranties/> for details.

Please refer to our website at [www.tremcosealants.com](http://www.tremcosealants.com) for the most up-to-date Product Data Sheets.

**NOTE:** All Tremco Safety Data Sheets (SDS) are in alignment with the Globally Harmonized System of Classification and Labelling of Chemicals (GHS) requirements.
