
PRODUCT DESCRIPTION

Paraseal® Paragranular™ is a premium, Wyoming-type, high swelling, granular, sodium bentonite. When in the presence of water, Paragranular reacts and forms an impervious waterproof gel.

BASIC USES

Paragranular is designed to work in conjunction with Paraseal products to form a waterproof transitional seal. It is used to form a cove at all horizontal to vertical transition, at floor/wall transitions, and penetrations through horizontal surfaces, and to fill voids around irregularities. Saltwater grade Paragranular is also available upon request.

AVAILABILITY

Immediately available from your local Tremco Sales Representative or Distributor. For Distributor locations, visit www.tremcosealants.com.

PACKAGING

50-lb (22.7-kg) bags yielding approximately 37 linear ft (11.28 M)
