**Product Description**

TREMproof® Amphibia™ Grip Tape is a double-sided, synthetic rubber composite membrane tape, with a butyl adhesive on one side and a fleece material facing. A removable release paper protects the adhesive membrane backing until removed during installation.

**Basic Uses**

TREMproof® Amphibia™ Grip Tape is used to seal TREMproof Amphibia sheet waterproofing membrane seam overlaps during installation, allowing for the continuous adhesion of the membrane to the concrete. The TREMproof Amphibia Grip tape and adhesive prevents the overlaps of the membrane sheets from being "opened" during installation, as well as during construction procedures. The butyl tape bonds strongly to the TREMproof Amphibia membrane to seal the overlaps, while the fleece facing enhances the tape's ability to adhere to concrete.

The TREMproof Amphibia Grip Tape is adhered to the white, non-woven fleece fabric layer of the Amphibia waterproofing membrane facing the installer and pressed or rolled down to ensure full adhesion.

**Availability**

TREMproof® Amphibia™ Grip Tape is immediately available from your local Tremco Sales Representative. For Distributor locations, visit www.tremcosealants.com.
