Product Description
TREMstop® IA+ is a high-performance, single-component, water-based, firestop sealant that will expand to fill the voids left when combustible materials burn and deteriorate in a fire.

Basic Uses
TREMstop IA+ is tested to treat the majority of the common applications found on a job site, including metal pipe, plastic pipe, insulated pipe, cables, ducts and multiple penetrations.

Features and Benefits
- Advanced performance capabilities make TREMstop IA+ a best in class intumescent acrylic. This versatile firestopping product has exceptional sealant qualities, including superb unprimed adhesion, easy gunning and antifungal properties. It can also be painted once fully cured.
- TREMstop IA+ will also seal against airflow, which will help to reduce sound transmission for openings breached by penetration.

Availability
Immediately available from your local Tremco Field Representative, Tremco Distributor or Tremco Warehouse.

Coverage Rates
308' of joint per gal for a 1/4" x 1/4" (6 mm x 6 mm) joint. For specific coverage rates that include joint size, and usage efficiencies, visit our website usage calculator at www.tremcosealants.com

Packaging
10.1-fl. oz (300-mL) cartridge, 20-fl. oz (600-mL) sausage, 5-gal (19-L) pail

Colors
Rust Red

Shelf Life
1 year when stored at 40 to 110˚F (5 to 43˚C)

Storage
Store TREMstop IA+ in original, undamaged packaging in a clean, dry, protected location with temperatures between 40 to 110˚F (5 to 43˚C).

Applicable Standards
- UL 1479 (ASTM E 814)
- UL 723 (ASTM E 84)
- UL 2079 (ASTM E 1966)
- CAN/ULC-S115M
- FBC® System Compatible

Fire Rated
Available at: http://www.tremcosealants.com/technical-resources/fire-systems.aspx

Limitations
- Not recommended for use with passive fire containment systems not listed or approved by Tremco
- Keep from Freezing

Joint Description
Mineral wool, closed cell, or reticulated polyethylene backer rod is recommended as joint backing to control sealant depth and insure intimate contact of sealant with cavity wall when tooling. Certain types of backing material may be required by system. For additional information on firestop system components, please visit www.tremcosealants.com/commercial/firestop.

Sealant Dimensions
Consult Tremco Passive fire system listed or approved by Tremco

Cure Time
At 77 °F (25 °C), 50% RH, TREMstop IA+ is tack free in 30 to 60 minutes and dries at a rate of about 1/8" (3 mm) per day. As the temperatures decrease, the dry time of TREMstop IA+ will increase, generally one additional day for every 10 °F decrease in temperature.

Clean Up
Excess sealant and smears can be cleaned up or removed with soapy water before sealant skins. Any utensils used for tooling can also be cleaned with soapy water.

Warranty
Tremco warrants its Products to be free of defects in materials, but makes no warranty as to appearance or color. Since methods of application and on-site conditions are beyond our control and can affect performance, Tremco makes no other warranty, expressed or implied including warranties of MERCHANTABILITY and FITNESS FOR A PARTICULAR PURPOSE, with respect to Tremco Products. Tremco’s sole obligation shall be, at its option, to replace, or refund the purchase price of the quantity of Tremco Products proven to be defective and Tremco shall not be liable for any loss or damage.

Please refer to our website at www.tremcosealants.com for the most up-to-date Product Data Sheets.

NOTE: All Tremco Safety Data Sheets (SDS) are in alignment with the Globally Harmonized System of Classification and Labelling of Chemicals (GHS) requirements.
