

# TECHNICAL DATA SHEET

# TREMCO® PUMA BC LM

Low-Modulus Polyurethane-Methacrylate (PUMA) Base Coat

# PRODUCT DESCRIPTION

Tremco PUMA BC LM is a polyurethane-methacrylate (PUMA) base coat. It is a lower modulus version of Tremco PUMA BC, used as the waterproofing membrane for Vulkem EWS and TREMproof PUMA for service temperatures below 32º F (0º C). Tremco PUMA BC LM bonds firmly to Tremco PUMA Primer. It retains its integrity even if substrate movement causes hair-line cracks of up to 1/16" (1.5 mm). If cut or damaged, Tremco PUMA BC LM will prevent water migration between itself and the substrate. Tremco PUMA BC LM requires the use of Tremco PUMA Initiator+ for cure.

### **BASIC USES**

Tremco PUMA BC LM is commonly used as the waterproofing membrane in buried applications and as the base coat in traffic coating applications. Tremco PUMA BC LM can also be used where a low-modulus sealant is required in moving joints.

## **AVAILABILITY**

Immediately available from your local Tremco Sales Representative.

#### **PACKAGING**

Tremco PUMA BC LM: 6-gal pails.

# **APPLICABLE STANDARDS**

ASTM C957 CSA S413

#### INSTALLATION

Tremco PUMA components are designed for use with the Vulkem EWS and TREMproof PUMA systems. Please refer to the appropriate application instructions for complete application details. The techniques involved may require modification due to job-site specific conditions. Consult your Tremco representative for recommended site conditions and requirements.

# **LIMITATIONS**

- Do not apply to damp or contaminated surfaces.
- Use with adequate ventilation.

# **WARRANTY**

A repair or replacement warranty is available on all Tremco products. Visit https://www.tremcosealants.com/warranties/ for details.
