

# SPECTREM® RESTORATION OVERLAY

## Silicone Dense Rubber Extrusions

### Product Overview

Over time, exposure to UV and extreme weather conditions impact the integrity of skylights and sloped glazing systems. When gaskets and existing sealants fail, the system is compromised, leading to air and moisture penetration and structural damage. Tremco's Spectrem® Restoration Overlay is designed specifically to eliminate what would be a costly and time consuming process to restore the weathertightness to these systems. While a typical restoration would include deglazing, resealing and disassembling the skylight system, our patented restoration system eliminates those laborious steps with a cost-effective, durable gasket overlay that is streamlined, aesthetically pleasing and designed for lasting performance. The Spectrem® Restoration Overlay is adhered to substrates using Spectrem 1 Silicone Sealant, creating a complete, compatible, warranted weatherproofing system.

*Silicone Dense Rubber Extrusions—custom designed, patented solution for restoring leaking skylights, sloped glazing, pressure bar and zipper/lockstrip systems*

### Features & Benefits

- Cost effective alternative to traditional dry glazing repair method involving total removal and replacement of the system components
- Less sealant, plus reduced time and labor versus other repair methods
- Patented design encapsulates silicone sealant bead for extra layer of protection
- Better long-term performance against air and water leakage compared to traditional dry glazing repair method
- Leak points are drastically reduced with all joineries, other penetrations and screw heads completely covered
- High movement capability
- Color-fast formula resistant to the effects of UV exposure
- Wide operational temperature range
- Non-corrosive and corrosion resistant
- Better overall aesthetic with sealant minimally visible providing straight sight lines on the interior and exterior for a clean appearance
- Easy installation and clean-up
- 20-year warranty

### Sizes & Colors

- Spectrem Restoration Overlay is custom manufactured and offers these options:
  - Standard black color with special color matching available upon request
  - Extruded profiles available in width and height to meet any need

Timing, lead times and cost may be obtained from your local Tremco Sales Representative, or by contacting Tremco's Customer Service Department in Ashland, Ohio,

# Minimize Risk With Single-Source Warranties

Peace of mind comes easy with single-source warranties from Tremco, eliminating the need to deal with multiple vendors if there is ever a problem.

A Tremco single-source warranty provides confidence that your building's weatherproofing system is backed by a financially stable company with more than 85 years' experience, success and proven performance in the industry.

## Documented, Tested Performance

With Tremco tested systems, there's no guessing about whether the solution will perform. The answer is simple: Tremco's rigorous, in-house performance testing of the Spectrem Restoration Overlay and Spectrem 1 Silicone Sealant ensures adhesion, compatibility and long-term weatherability.

Tremco offers the industry's only comprehensive line of weatherproofing solutions for sealing the entire building enclosure from the foundation to the roof, fully tested to ensure continuity at critical terminations and connections, where leaks are most likely to occur.

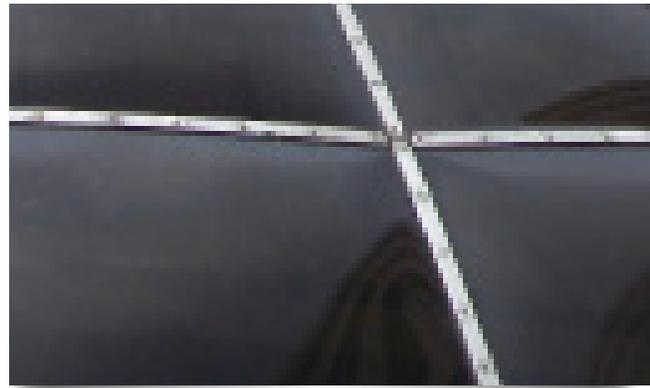

*Spectrem Restoration Overlay*

*Patented "foot" design encapsulates sealant bead*

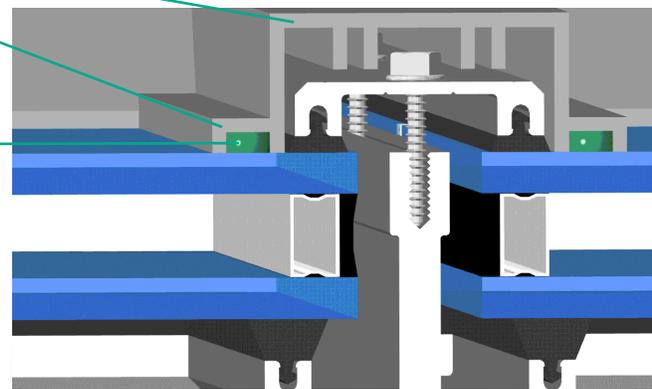

*Spectrem 1 Silicone Sealant*

Spectrem Restoration Overlay's patented design allows it to encapsulate leaking purlins while completely enclosing the silicone sealant bead. The result is a clean, aesthetically pleasing appearance plus an extra layer of protection that shields the sealant bead from exposure to the elements and eliminates air and moisture penetration.
