**TREMCO ACQUIRES SCHUL AND WILLSEAL, INDUSTRY LEADERS  
IN ACRYLIC-IMPREGNATED FOAM SEALANT TECHNOLOGY**

**BEACHWOOD, Ohio (June 18, 2019)** – Tremco Incorporated has acquired Schul International Co., LLC (Schul) and Willseal LLC (Willseal), the company announced recently. Schul is a Hudson, New Hampshire-based manufacturer of pre-compressed, self-expanding foam tapes used for sealing vertical and horizontal joints in commercial construction, infrastructure, OEM/industrial and residential applications. Also based in Hudson, N.H., Willseal is a sales and marketing company targeting these applications with products from Schul.

The Schul and Willseal subsidiaries will continue to operate under those names and will work in close alignment with Tremco's Commercial Sealants & Waterproofing (CS&W) Division.

Through the acquisition, Tremco adds proprietary systems, including those that are fire rated to provide passive fire protection, and others that are pre-coated with silicone to deliver weather-tight joints. The systems are further differentiated by their use of monolithic foam, whereas competing products are made from several layers of foam that are then laminated together

"The addition of Schul and Willseal to the Tremco CS&W portfolio gives us best-in-class impregnated foam joint sealant products," stated Tremco CS&W President Chuck Houk.

The Sealtite and Willseal products — brands with over 20 years of sales and specification presence – complement Tremco’s existing restoration offering including PUMA technology liquid expansion joint systems, traffic coatings, glazing systems, sealants, wall coatings and other products.

“This acquisition also provides Tremco with increased production capacity and market-facing brands in Willseal and Sealtite that can be leveraged immediately,” said Houk. “The complementary, premium products, talented people, and technical expertise of both organizations will allow us to further strengthen our position as the leading producer of connectivity solutions for the high-performance building enclosure.”

### **About Tremco Commercial Sealants & Waterproofing**

Tremco Commercial Sealants & Waterproofing (CS&W) is North America's foremost supplier of sealant, weatherproofing, and passive fire control solutions for commercial and residential construction and industrial applications. When it comes to protecting and weatherproofing the entire building envelope, Tremco is uniquely positioned to provide single-source products, services and solutions. With experienced sales representatives in every major market throughout North America, Tremco offers assistance with specification development, application-specific product development, problem-solving, in-house testing and field support services.
