Permanent seam tape centered over edge adhered with ParaPrimer

Concrete placement direction 4"

HDPE side of Paraseal GM/LG

Bentonite side of Paraseal GM/LG

Compacted Base or 2" Sand Slurry Mud Slab Required

Para JT Tape

Washer headed nail as needed in the seam area only as shown and nail head covered with Para JT Tape

Soil or compacted granular base

NOTE: Paraseal products require a min of 24 PSF of compaction/confinement in order to function as designed.

NOTE: When pouring concrete over the Paraseal GM/LG pour either directly on top of the seam or towards the closed edge of the seam so as not to lodge concrete between the lapped seam.

NOTE: Must be approved by Tremco for use in submerged conditions.
