ACOUSTICAL/ CURTAINWALL SEALANT

One-Part, Non-Skinning, Sound
Dampening Sealant

PRODUCT DESCRIPTION

Tremco® Acoustical/Curtainwall Sealant is a single-component, non-skinning, non-hardening synthetic rubber sealant intended for use in sound dampening systems.

BASIC USES

Tremco Acoustical/Curtainwall Sealant was developed for acoustical sealing of the following:

- Drywall partitions
- Curtainwalls
- Corridors
- Party walls

FEATURES & BENEFITS

The application of Tremco Acoustical/Curtainwall Sealant greatly increases the Sound Transmission Class (STC value) of a system and reduces the decibel level when one or more beads are applied to a joint.

Tremco Acoustical/Curtainwall Sealant does not cure or dry by design. It is a non-skinning, non-hardening formula that will remain viscous and tacky to further aid in decreasing sound transmission.
