

TREMPROOF® 6100

Hot-Applied Rubberized Asphalt System

Product Overview

TREMProof® 6100 Hot-Applied Rubberized Asphalt system is a flexible, durable, 100% solids, self-healing membrane with a proven track record since 1978. Tremco's 215 mil fabric-reinforced system is ideal when hot-rubberized asphalt is desired.

Applications

- + Plaza / Podium Decks / Split Slab
- + Planters
- + Under Paver Systems
- + Insulated Decks
- + Vegetated Roofs

Benefits Checklist

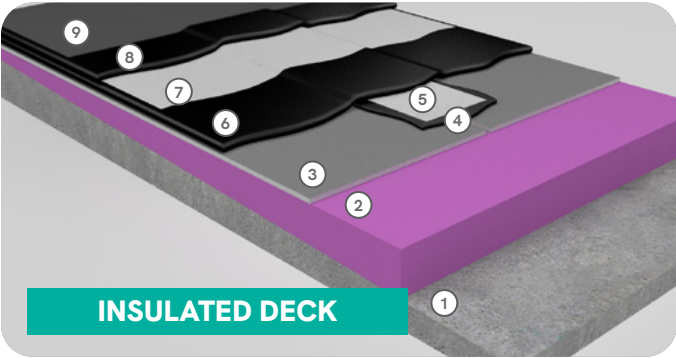

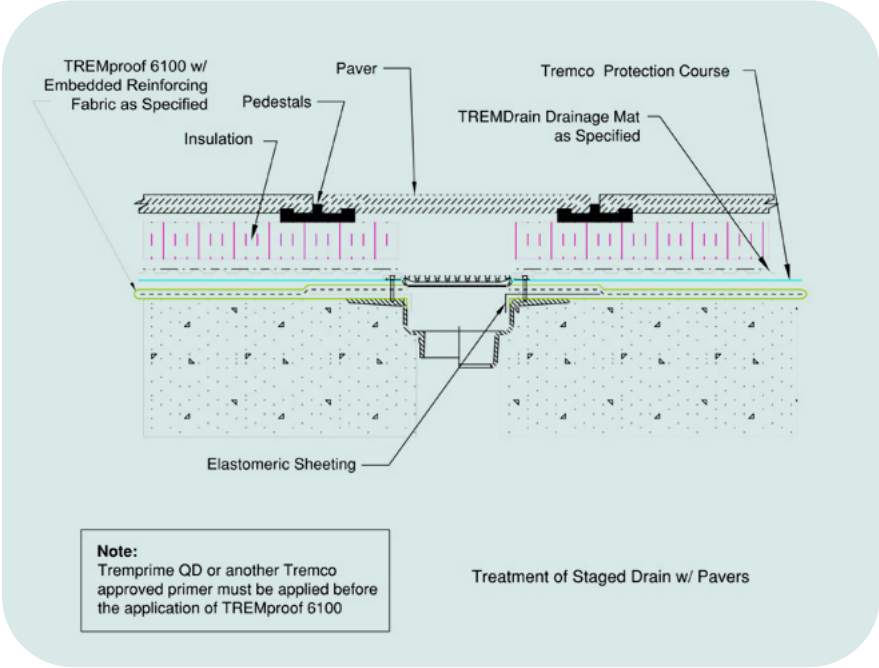

- ✓ Tested extensively for adhesion and compatibility with Tremco's high-performance air barriers, coatings, sealants, and waterproofing membranes.
- ✓ Comprehensive single-source warranty when used with other Tremco building envelope systems.
- ✓ Experienced sales and technical support throughout design, detail development, and installation.
- ✓ City of Los Angeles approval (LARR #25299)
- ✓ Product manufactured by Tremco in an ISO 9001 certified facility, ensuring consistent product quality.

Our TREMPROOF 6100 membrane combined with multiple coatings, barriers and sealants ensure lasting protection.

Get started with
Design Assistance from Tremco.

Complex jobs often require custom solutions. Tremco is uniquely qualified to provide job-specific details for even the most demanding waterproofing applications. Experienced, knowledgeable Tremco field and technical services representatives in every major market across North America provide assistance with product selection, specifications, system design, testing and on-site support.

- INSULATED DECK

1. Concrete substrate

2. Extruded insulation

3. Primed roof board

4. TREMPROOF 6100

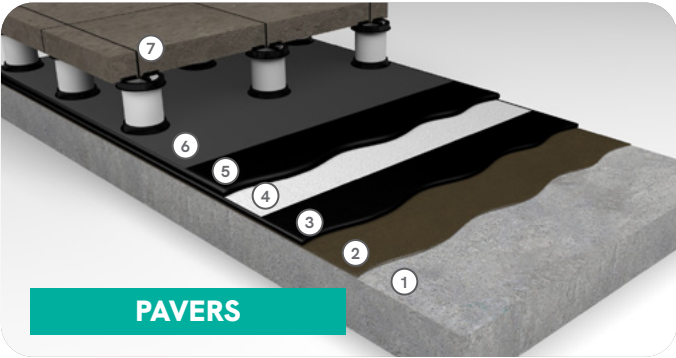

5. Tremco Reemay strip

6. 90 mils TREMPROOF 6100

7. Tremco Reemay

8. 125 mils TREMPROOF 6100

9. Tremco-approved protection course

- PAVERS

1. Concrete substrate

2. Primer

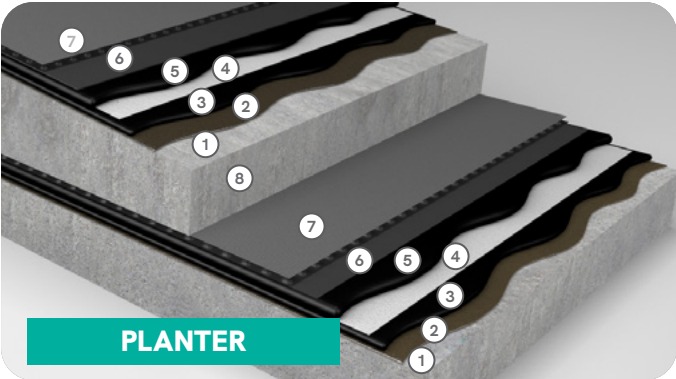

3. 90 mils TREMPROOF 6100

4. Tremco Reemay

5. 125 mils TREMPROOF 6100

6. Tremco-approved protection course

7. Paver / pedestal system

- PLANTER

1. Concrete substrate

2. Primer

3. 90 mils TREMPROOF 6100

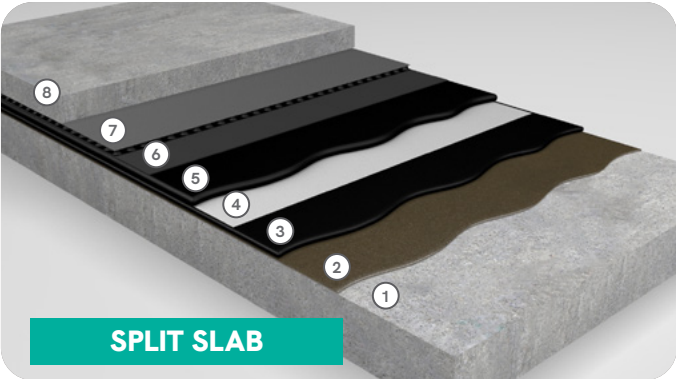

4. Tremco Reemay

5. 125 mils TREMPROOF 6100

6. Tremco-approved protection course

7. TREMDrain® drainage board

8. Sloped concrete topping slab

- SPLIT SLAB

1. Concrete substrate

2. Primer

3. 90 mils TREMPROOF 6100

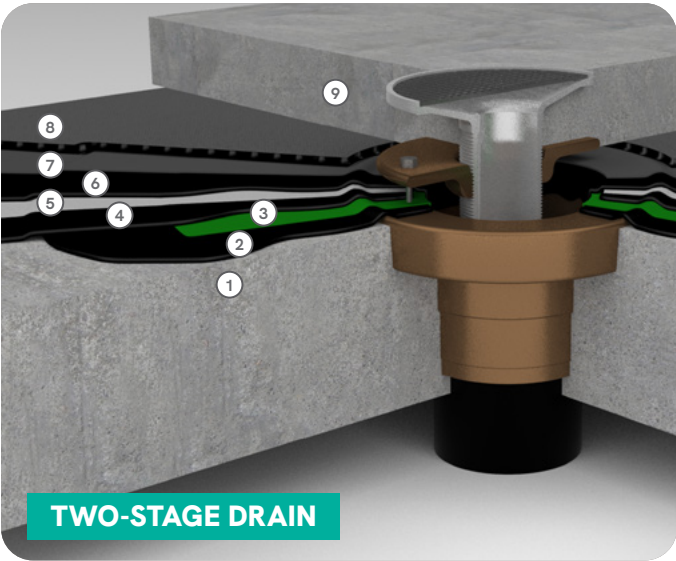

4. Tremco Reemay

5. 125 mils TREMPROOF 6100

6. Tremco-approved protection course

7. TREMDrain drainage board

8. Concrete topping slab

- TWO-STAGE DRAIN

1. Primed concrete substrate

2. TREMPROOF 6100

3. Tremco Elastomeric Sheeting (uncured neoprene)

4. 90 mils TREMPROOF 6100

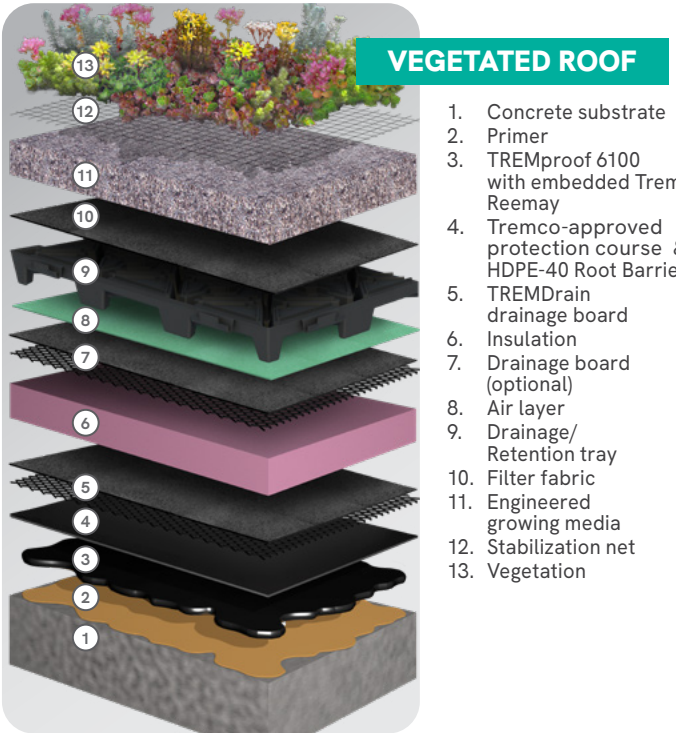

5. Tremco Reemay

6. 125 mils TREMPROOF 6100

7. Tremco-approved protection course

8. TREMDrain drainage board

9. Concrete topping slab

- VEGETATED ROOF

1. Concrete substrate

2. Primer

3. TREMPROOF 6100 with embedded Tremco Reemay

4. Tremco-approved protection course & HDPE-40 Root Barrier

5. TREMDrain drainage board

6. Insulation

7. Drainage board (optional)

8. Air layer

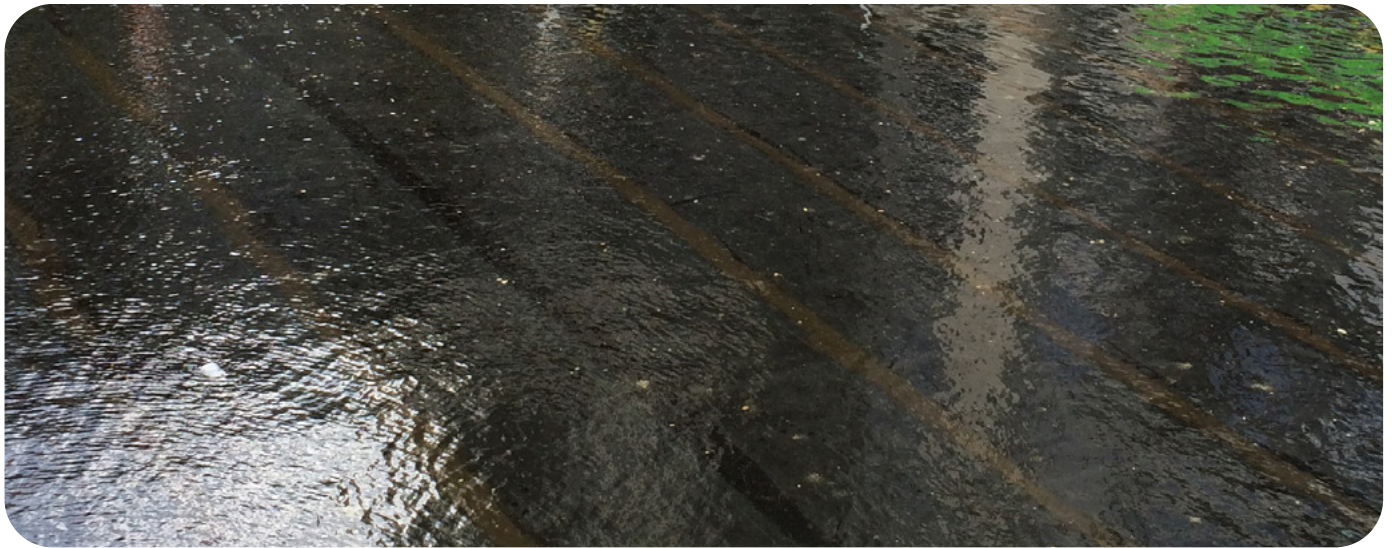

9. Drainage/ Retention tray

10. Filter fabric

11. Engineered growing media

12. Stabilization net

13. Vegetation

Tremco's System Warranty*

- + Enhanced warranties available including watertight, labor & material and no dollar limit for pre-approved projects
- + Combined with other Tremco Building Envelope Systems
- + Compound warranties can include coverage for approved system components including:
 - Performance of the chosen paver system
 - Components of the vegetated roof system
 - Thermal retention of the insulation
 - Removal and replacement of overburden

*Contact your local Tremco representative for project-specific warranty terms and conditions.
