

# METALITE® 8000 OVER SECUROCK® EXOAIR® 430

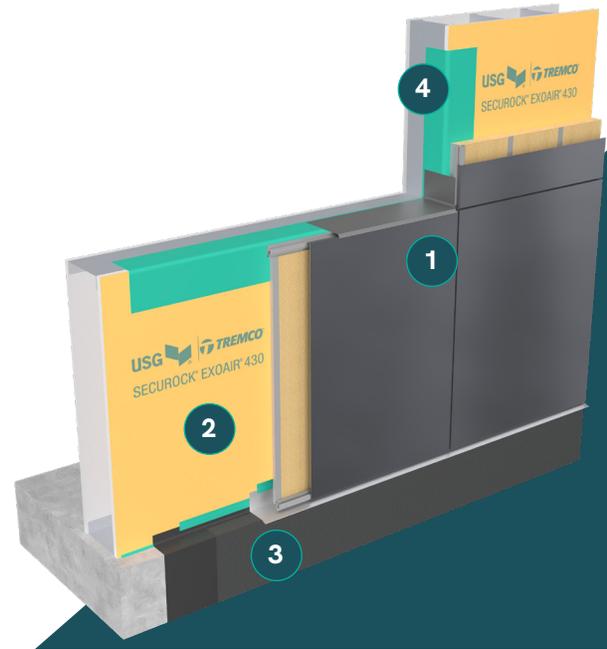

A System Combining Metal Composite Material (MCM) Panel with an Air & Vapor Permeable Membrane

## Product Overview

Achieve a superior building envelope with a comprehensive, fully tested wall assembly designed for performance, durability and aesthetic appeal.

The system is finished with Metalite® 8000 cladding system, offering a sleek, flat and rivetless finish. This modern aesthetic is cost-effective and easy to install, delivering a premium look without compromising on performance or budget.

At the core of this assembly is the Securock® ExoAir® 430 (SE430) system, which is an integrated glass-mat sheathing panel with a factory applied air and water barrier. SE430 ensures superior protection against moisture and air infiltration, enhancing the building's energy efficiency and long-term durability.

## System Components:

1. Metalite 8000 Drained/Back-Ventilated Rain Screen Metal Composite Material System
2. Securock ExoAir 430 Air Barrier Tied-In to all Transitions at Windows, Penetrations and Roof Parapets
3. Tremco Below-Grade Waterproofing Tied-In to Air Barriers at Grade
4. Tremco Approved Sealant and Flashings

## Features & Benefits

**Single-Source Warranty**  
A comprehensive warranty that covers the entire wall assembly.

**Prefabrication**  
Reduces the cost of time, labor and materials on the jobsite.

**Fully Tested**  
Third-party tested against the latest standards, including NFPA 285.

**Modern Aesthetic**  
Delivers a clean, rivetless MCM finish with exceptional aesthetic appeal.

**Cost-Effective & Easy Installation**  
Streamline the construction process with a system designed for efficiency.

**Weatherability**  
Mitigates air infiltration / exfiltration and water penetration.
